

## "SNSF Professor" at the Swiss Federal Institute of Technology Lausanne EPFL

The School of Life Sciences at the Ecole Polytechnique Fédérale de Lausanne (EPFL) (<http://sv.epfl.ch/>) is a rapidly growing academic centre that is progressively establishing itself on the international scene as a major player in biomedical research. Our interests span broad areas of the life sciences, with a special emphasis on neuroscience, bioengineering, cancer, development, metabolism and infection biology. We ambition to capitalize on the strong technological orientation of the EPFL to investigate biomedical questions with innovative and highly quantitative approaches.

The School is offering to host one or several

### **"Swiss National Science Foundation Assistant Professor(s)"**

sponsored by the SNSF Professorships program from the Swiss National Science Foundation ([www.snf.ch/E/funding/individuals/SNSFProfessorships](http://www.snf.ch/E/funding/individuals/SNSFProfessorships)). We invite interested eligible individuals to send us a pre-proposal for selection of those that will receive formal institutional support from the EPFL for their SNF application process.

While scientists active in all research domains present at the School will be considered, applications in the fields of stem cell biology, structural biology and bioinformatics are particularly encouraged.

We will provide the successful candidate(s) with appropriate lab and office space, full logistic support and access to all infrastructures, services, and facilities within EPFL.

Candidates are invited to submit, as a single pdf file, a curriculum vitae with list of publications, names of 3 references, and a 2-3 pages research synopsis describing their research accomplishments and objectives for the next few years. Please submit your file to Dr. Harald Hirling ( [harald.hirling@epfl.ch](mailto:harald.hirling@epfl.ch) ) no later than 1<sup>st</sup> March 2010.
